

The 12 enterprises of the Intesa Sanpaolo and INNOVIT mission to San Francisco:

ATON	IT services	A benefit corporation, it is a tech company specialising in advanced software solutions and digital transformation services. It has made artificial intelligence one of the pillars of its offering and has a strong focus on technological innovation and positive social impact https://aton.com/en/	Villorba (TV), Veneto
GALDI	Mechanics	A company specialising in packaging solutions, with a focus on the food and beverage industry. It has invested significantly in the digitisation of its processes and products, integrating AI systems into packaging machines https://www.galdi.it/en/	Paese (TV), Veneto
I.CO.P.	Construction	A non-profit company, it operates in the construction and civil engineering industry, specialising in special foundations and underground works (microtunnelling, maritime works, critical infrastructures, energy and water networks). It has developed proprietary technologies and a strong orientation towards sustainability. The company has implemented advanced digital monitoring systems on construction sites to collect and analyse data in real time using AI algorithms https://www.icop.it/en/	Basiliano (UD), Friuli-Venezia Giulia
LAS MOBILI	Furniture	The company specialises in the production of high-quality office furniture. It is characterised by innovative design and furniture solutions integrating advanced technology. AI-assisted parametric design software is used to tailor furniture solutions according to specific customer requirements https://www.las.it/en/	Tortoreto (TE), Abruzzo
MAC&NIL	IoT and IT services	Company specialising in software and IoT (Internet of Things) solutions. It stands out for the development of innovative technology solutions and advanced software platforms in particular in the Automotive and Fleet Management market https://www.macnil.it/en/	Gravina in Puglia (BA), Apulia
MALVESTIO	Health System	It operates in the healthcare sector, specialising in the design and production of furniture and equipment for hospital and healthcare facilities. The company has a long tradition of manufacturing excellence combined with constant innovation and is part of the biomedical cluster in Padua https://malvestio.it/en/	Villanova di Camposampiero (PD), Veneto
MANTA GROUP	Mechanics	Specialising in the design, production and assembly of structural parts, precision mechanics, composite products, and the construction of aeronautical assemblies and subassemblies, with a focus on innovation and sustainability. The company combines Italian manufacturing tradition and advanced technology in the production of high quality solutions and is part of the aerospace cluster in Apulia https://www.mantagroup.it/en/home_en/	Foggia, Apulia

MARTINOROSSI	Agricultural food	Leading agricultural food company specialising in the production, processing and transformation of pulses and cereals from controlled, allergen-free supply chains using a 100% natural process https://www.martinorossispa.com/	Cremona, Lombardy
MOVE	Electrotechnics	A company specialising in sustainable mobility and structural monitoring. It operates mainly in the areas of monitoring bridges, railways, large works (heavy construction) and vertical structures. Taking an integrated approach, it offers advanced, patented solutions combining hardware and software, providing its customers - asset managers, engineering companies and general contractors - with unique added value in the industry. https://www.movesolutions.it/	Lucca, Tuscany
PODIUM ENGINEERING	Automotive	An engineering company specialising in the automotive industry, with a focus on electric vehicles and innovative technologies. It has developed unique expertise in the design and development of advanced mobility solutions: from neural networks for predictive modelling in vehicle dynamics models to higher performance electric battery solutions (including for motor sport competitions on electric vehicles) https://www.podium-tech.com/	Point-Saint-Martin (AO), Aosta Valley
RAIN	Irrigation products	A company specialising in the production and marketing of automated irrigation systems with a focus on water saving and end-user efficiency. It has also developed a technologically advanced line based on artificial intelligence for the optimisation of green management https://www.rain.it/en/	Milan, Lombardy
SANTINI	Sportswear	A historic company specialising in the design, production and marketing of technical sportswear for cycling and triathlon. It boasts 60 years of market presence and is constantly growing, combining family character with management https://www.santinicycling.com/en/	Lallio (BG), Lombardy
